Subject: Deterent to smoking

it's not just the price of tobacco nor the picture you put on the box.

Need t let them know the bad things that can happen to them, their familiar, friends, job, environment, etc....

for example, the health issues associated with smoking. the inconvenience and pain to the rest of the family members if things goes wrong. the funds to rectify and pressure on family, etc.

butts choking the pipes and causing water ponding when not disposed properly.

jobs loss when others(bosses) do not smoke but deems smoking as socially non acceptable in certain circumstances, etc.
