Language	Name	Outlet Name	Loss of profitability due to increased time and manpower costs to manage the product category	Customers down-trading to cheaper products due to a lack of product differentiation as a result of the removal of on-pack branding	Longer service time per customer due to issues with identifying the correct packs	More time needed for my staff to conduct stock checks when receiving and merchandising new stocks	More time needed to train new staff to be familiar with stocktaking and retailing the tobacco category	Opportunist theft from my store by customers and front liners due to increased complexity to retrieve stocks behind closed cigarette dispenser doors	It will be easier for Plain Packaged products to be counterfeited as the packaging is very easy to replicate	Retailers, consumers, and law enforcement authorities will not be able to easily differentiate legal packs from illicit products	As there would likely be an increase in the supply of illegally smuggled products, this would make it easier for under age youths to get access to illicit tobacco products	Plain Packaging will lead to a rise in gangs involved in the smuggling of illicit tobacco products as well as in other criminal activities, and therefore compromise our neighbourhood and national security	If some form of packaging change were to be considered for implementation In Singapore, it would at a minimum need to allow for the continued use of the trademarked logo, brand and variant name on both packs and cartons to enable retailers, customers and law enforcement authorities to easily differentiate among tobacco products.
