

Five Core Safe Management Measures (SMMs)

Parameter*	Posture from 13 February 2023
(1) Group Size Limit	None
(2) Mask-Wearing	To be retained as MOH requirement in healthcare and residential care settings ^
(3) Work from Home Requirements	None
(4) Safe Distancing	None
(5) Capacity Limits	None

* While SMMs 1-5 will be inactive from 13 February 2023, they will continue to serve as key levers to regulate social interactions, and we will adjust the parameters if the situation requires it. Enterprises may maintain their own SMMs as company policy if they wish, for workplace health and safety, or for business continuity reasons.

^ Mask wearing is required in (i) patient-facing areas, (ii) when there is face-to-face interactions with patients, and/or (iii) when care is being delivered to patients. Healthcare and residential care facilities include hospitals and polyclinics, private primary care and dental facilities, specialist facilities, TCM clinics, renal dialysis centres, clinical and radiological laboratories, residential care homes (such as nursing homes), COVID-19 care facilities, testing centres and vaccination centres, as well as ambulances and medical transport vehicles. MSF will also apply this requirement to Homes for the elderly.
