

**27 September 2021 Daily Report on COVID-19**

**Figure 1:** Number of Local Cases by Already Quarantined/ Detected from Surveillance<sup>1</sup>  
(31 Aug – 27 Sep)

**Figure 2:** Number of Local Linked Cases by Household/ Non-Household Transmission<sup>1</sup>  
(31 Aug – 27 Sep)

<sup>1</sup> Incorporates re-classifications of earlier reported cases.

**Figure 3: Number of Local Cases by Age (28 Jul – 27 Sep)**

**Figure 4:** Active Cases in ICU, Requiring Oxygen Supplementation or Hospitalised <sup>2</sup> (28 Jul – 27 Sep)

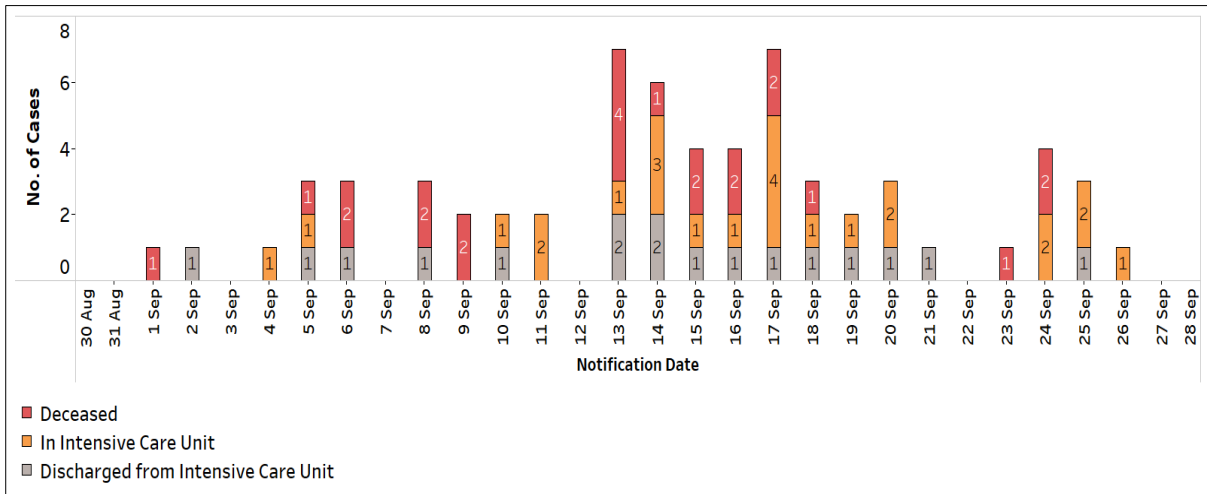

<sup>2</sup> Not fully vaccinated status includes persons who are partially vaccinated and completely unvaccinated.

**Figure 5:** Average Number of Days from Onset of Symptoms to Isolation (QO, hospital admission or notification to MOH) for Community Cases Detected through Surveillance in Each Day  
*Line represents the 14-day moving average; Bar represents the daily average<sup>3</sup>*

**Figure 6:** Deaths, Admissions into ICU and Discharges from ICU Among Local Cases by Notification Date

<sup>3</sup> Area in grey demarcates data points for the past 3 days where some cases may still be pending epidemiological investigation. The bar graph shows the daily average number of days from symptoms onset to isolation, while the line graph shows the moving average for the past 14 days. Both graphs exclude cases with no onset date (asymptomatic) in the computation of the average. Community cases with symptoms who are isolated on the same day that symptoms occurred would have an isolation time of 0. There is a gap in the line graph from 16 to 18 Sep as there are no symptomatic cases in the preceding 14 days.
