

Travel Conditions for Travellers from Brunei, Hong Kong and Macao

Brunei

We had earlier announced that travellers from Brunei will be allowed to go about their activities in Singapore, without a need to serve Stay-Home Notice (SHN), if their on-arrival COVID-19 Polymerase Chain Reaction (PCR) test results are negative.

2. Given the increased cases observed in Brunei, we will be tightening border control measures for travellers with travel history to Brunei. From **20 August 2021, 2359 hours**:

- a. Singapore Citizens (SCs), Permanent Residents (PRs) and Long-Term Pass holders entering Singapore with travel history to Brunei, within the last 21 days before departure for Singapore, will be subject to an on-arrival COVID-19 PCR test, a 7-day SHN at their place of residence, and a COVID-19 PCR test before the end of the SHN period.
- b. Short-term travellers holding an Air Travel Pass (ATP) with travel history to Brunei, within the last 21 days before departure for Singapore, will not be allowed to enter Singapore.

Hong Kong and Macao

3. We had earlier required travellers from Hong Kong and Macao to undergo a 7-day Stay-Home Notice (SHN), which can be served at their place of residence if suitable or their choice of accommodation¹. They will also be subjected to an on-arrival COVID-19 PCR test and another PCR test before the end of their 7-day SHN.

4. We have since reviewed the COVID-19 situation in Hong Kong and Macao, and will make the following changes:

- a. From **20 August 2021, 2359 hours**, all travellers entering Singapore from Hong Kong or Macao, and who spent the last 21 days there before departure for Singapore, will undergo a COVID-19 Polymerase Chain Reaction (PCR) test upon arrival, and will be allowed to go about their activities in Singapore if the PCR test result is negative. They will not need to serve a 7-day Stay-Home Notice (SHN) period.
- b. Short-term visitors who spent the last 21 days at Hong Kong or Macao before departure for Singapore, can apply for an Air Travel Pass with immediate effect, for entry into Singapore on or after 26 August 2021. They will undergo a COVID-19 PCR test upon arrival and will be allowed to go about their activities in Singapore if the PCR test result is negative.

¹ Singapore Citizens, Permanent Residents and Long-Term Pass Holders may serve their 7-day SHN at their place of residence, that they or their family members own or are sole tenants of, or in suitable accommodation such as a hotel or serviced apartment.

- c. Travellers who are already serving their 7-day SHN at their place of residence as of 20 August 2021, 2359 hours will still be required to complete their 7-day SHN and exit swab. They will be subjected to an on-arrival COVID-19 PCR test² and another PCR test before the end of their 7-day SHN.

² To expedite their on-arrival COVID-19 PCR test at the airport, travellers are strongly encouraged to register and pre-pay for their on-arrival COVID-19 PCR test prior to departing for Singapore at <https://safetravel.changiairport.com/>.
