Influenza Situation in Singapore 2018

Influenza indicators for E-week 26 (24 Jun - 30 Jun 2018) are as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI increased from 2,597 (over 5.5 working days) in E-week 25 to 2,987 (over 5.5 working days) in E-week 26.

The proportion of patients with influenza-like illness (ILI) among the polyclinic attendances for ARI is 1.5%.

The overall positivity rate for influenza among ILI samples (n=208) in the community was 24.5% in the past 4 weeks. Of the specimens tested positive for influenza in Jun 2018, these were positive for influenza A(H1N1)pdm09 (81.1%), influenza B (9.4%) and influenza A(H3N2) (7.5%). 2.0% of the influenza A specimens were untypable due to low viral titre.

Monthly Influenza Surveillance

Based on influenza-like illness (ILI) samples from GPs and polyclinics
